

Pedro Tessaro Augusto

iOS & Apple Developer

São Paulo – SP, Brazil · +55 11 99604-4373 · ptssar22@gmail.com
github.com/PedroTessaro · linkedin.com/in/pedrotessaro

Profile

Software developer focused on the Apple ecosystem, with apps published on the App Store for iOS and tvOS. Strong experience with Swift, SwiftUI and UIKit, and with frameworks such as CloudKit, MultipeerConnectivity, SpriteKit and GameplayKit. Also works on low-level systems (C, Rust and Assembly), including the development of his own compiled programming language.

Technical Skills

iOS & Apple Swift, SwiftUI, UIKit, CloudKit, Core Data, MultipeerConnectivity, HealthKit, SpriteKit, GameplayKit, Combine, tvOS, Xcode
Low-level C, Rust, Assembly (x86), Java, memory management, data structures, concurrency
Languages Portuguese (native), English (fluent), German (basic)

Experience

Apple Developer Academy 2025 – present
iOS Developer – Mackenzie, São Paulo

- Build applications for the Apple ecosystem in Swift and SwiftUI, from concept to App Store release.
- Implement cross-device data sync and persistence with CloudKit and Core Data, handling conflicts, offline states and consistency.
- Develop real-time device-to-device communication (iPhone and Apple TV) with MultipeerConnectivity.
- Work in multidisciplinary teams using agile methodologies and Challenge-Based Learning.

Education

B.Sc. in Computer Science 2024 – expected 2028
Universidade Presbiteriana Mackenzie

Technical Degree in Systems Development 2021 – 2022
ETEC Emílio Hernandez Aguilar

Selected Projects

NotADiary – Swift, SwiftUI, CloudKit, Core Data App Store
Journaling app with a robust sync and persistence system via CloudKit, handling conflicts and cross-device consistency.

Karthos – Swift, SwiftUI, CloudKit App Store
App for kart drivers featuring lap timing, metrics, gamification and a real-time global ranking of racers.

DeckExtinction – Swift, SwiftUI, GameplayKit App Store
Narrative game built on a complex decision-tree system using Apple's GameplayKit.

Narebatalha – Swift, UIKit, MultipeerConnectivity, tvOS
Multiplayer iOS/tvOS game with peer discovery and real-time state synchronization between devices.

TrigMage – Swift, SpriteKit, SwiftUI Swift Student Challenge
Trigonometry-learning game built in just over a week, with an animation system and time-based dynamic behavior.

Sword – C, Assembly x86 in progress
Compiled programming language written in C and x86 Assembly, exploring compiler design and code generation.

Music

Internationally award-winning pianist: 3rd place at the Crescendo Competition 2021 (Virtuoso category) and 3rd place at the Medici Music Competition 2021 (Youth Artist category).
